SUMMARY

Over twenty years in software engineering, from C++ browser extensions and Eclipse IDE tooling to Kubernetes networking and open business platforms. I design product-line architecture, lead engineering teams and keep writing the essential code myself. I like building tools people use every day and getting them to the point where they stop being annoying.

EXPERIENCE

Intabia Fusion - Co-Founder

Oct 2025 – present

Building Intabia Platform, a team workspace for all daily work. A product branch of the Huly platform: object model, live queries, persistent connection.

Huly Labs - Building Huly

May 2021 – Oct 2025

Huly Platform is an open framework for business applications: Chat, Project Management, CRM, HRM, ATS. Several teams build products on top of it, including Huly and TraceX. 26k+ stars on GitHub.

- Built the Tracker, the GitHub Integration and many system-level and UI components.
- Stack: TypeScript / Node.js, Svelte on the UI, some services in Go.

TraceX - Building TraceX on Huly Platform

Jan 2023 – present

Novosibirsk State University - Teaching

2023 – present

Object-oriented programming course in C++ and Java for students.

Network Service Mesh - Software Engineer

Oct 2018 – Sep 2020

Hybrid / multi-cloud IP service mesh for Kubernetes, built from scratch. Worked on the core and integrations in Go.

Xored Software Inc - 15 years 9 months, Novosibirsk

Sep 2005 – May 2021

Projects for Cisco Systems, Spirent Communications, InterSystems Corporation, British Telecom.

Principal Software Engineer

Mar 2013 – May 2021

- Macro-scale architecture of technologies and product lines; guidance and oversight for multiple development teams.
- New initiatives: choosing architecture and technology directions for enterprise-class, high-performance, scalable products.
- Individual contributor to company products and research, including Eclipse DLTK and Eclipse RCPTT.
- InterSystems Atelier (Caché IDE): contributions, Eclipse DLTK support, RCPTT UI automation.
- Led several products on React.js / Meteor / Node.js with natural language processing.
- Q7 technical consultant: full-featured ECL debugger and other improvements; Q7 moved to Eclipse as the open-source RCPTT project.
- Technical Leader of YANG-IDE and of an enterprise customer product: team coordination, UI and backend, performance.
- Technology research: Nim, React.js, Imba.io, Cycle.js as candidates for a new platform.

Senior Software Engineer

Sep 2005 – Mar 2013

- **Eclipse DLTk** - one of the initial contributors: core of the framework and full IDEs for TCL, Ruby, JavaScript.
- **Q7** - UI test automation for Eclipse/SWT: low-level record/replay runtime, AspectJ, RAP support, JDT-style lazy model for test cases; tuned the runtime to pass 1500+ test cases for a customer project.
- **Q7 Server** - distributed test execution, client/server/agent architecture with ECL as RPC: scheduling, stability, fault-tolerant communication.
- **ECL** - command language for test scripts, contributed widely to the language and framework.
- **F4** - Fantom IDE for Eclipse on DLTk: initial Java version, JDT integration, FFI completion and navigation.
- **RCPML** - XML-based declarative UI engine with CSS styles and SVG.
- **YANG-IDE** - IDE for the NETCONF modeling language for telecom: EMF resource model, custom XML serialization, GEF/GMF diagram editors.

Novosoft LLC - Software Architect and Developer

Feb 2004 – Aug 2005

HandyPassword, a password manager and secure storage extension for Internet Explorer. Architecture of the server and the browser client, standalone application and IE toolbar. C++, MS COM, Internet Explorer APIs.

OPEN SOURCE

Hum1izer	Go CLI that finds officialese, clichés and AI traces in prose, code comments and commits. github.com/haiodo/hum1izer
Intabia Platform	Open platform for team work, a product branch of the Huly platform. github.com/intabia-fusion/platform
Tenniarb	Native mind-map editor for macOS in Swift with its own diagram format. github.com/haiodo/tenniarb
Eclipse RCPTT, DLTK	eclipse.dev/rcptt, eclipse.dev/dltk

SKILLS

Languages	Go, TypeScript / JavaScript, Java, C++, Swift, TCL, Ruby
Frontend Platform	Svelte, React, Vue, HTML / CSS Node.js, Kubernetes, Eclipse RCP / EMF / GEF
Practice	Architecture, enterprise software, test automation, start-up leadership

EDUCATION

Novosibirsk State University

Master's Degree, Information Technologies 2005 – 2007

Bachelor's Degree, IT 2001 – 2005

LANGUAGES

Russian - native. English - professional working.
